Doge Universe
— SPACExDOGE —
Doge Universe

**Growth. Problem. & Solution:**

With billions of dollars entering the meme-coin market and millions of new investors looking for the next 1000x opportunity, there is one significant issue: FRAUD. Rug-pulls and exit scams have become a significant problem in the cryptocurrency market. The platform developed by Doge- Universe (DogeUniverse.Finance) will significantly reduce the likelihood of these events occurring. The rug war has begun!

**NFTs. New Method To Enhance The Value:**

The NFT market has grown to be a multibillion-dollar enterprise. It is simple to create an NFT and circulate it. Our new method of creating and distributing NFTs via gamers who act as miners will increase the rarity and value of our beloved NFTs. A new ecosystem has entered the conversation, one that will enable gamers and all content creators to profit from their valuable work and art while also increasing the market's value.

**Gaming. Virtual-Gaming Decentra-Land. Universal Explorations:**

We will revolutionize the future of gaming by implementing blockchains, non-volatile memory, decentralized universes, and, eventually, quantum computing, which will exponentially improve the overall quality of gaming to an unfathomable level. Graphics, memory, and gameplay quality will be light years ahead of what we currently have. By connecting computers to our brains, we will be able to duplicate universes and engage in simulations. Doge- Universe will advance the research and development necessary to make these dreams a reality.

**A New Social-Ecosystem:**

Our De-Fi platforms will foster the growth of new crypto ecosystems. A more sophisticated platform for user interaction. Crypto freelancers will be able to accept work via the platform from other projects or from anyone in need of crypto-related services such as smart contract development, web development, marketing, and graphic design.

**Decentralized Governing Community:**

Providing an improved and decentralization governance community. The original purpose of cryptocurrencies is a decentralized currency in which no single entity has central authority over the currency.
NFT & Gaming

Proof of gaming (POG):

Enabling gamers to compete for those NFTs and providing them with a means of earning money through the Doge-Universe marketplace. What makes it unique is that anyone can submit copyrighted NFTs, but POG will be required before NFTs can be distributed. This method significantly increases the value of all NFTs because it requires additional time and expertise.

Mining:

Gamers will take on the role of miners. They will have the opportunity to compete amongst other players in games, virtual games, competitions, challenges and many more. There will be numerous real-time obstacles. In one of the game modes, players can compete in battle royal against a selected pool of players ranked according to their level. Players will compete for Doge Packets. Prizes inside the Doge Packets will include collectable cards of various tiers that can be upgraded to limited NFTs, SPACExDOGEs (the currency used across all Doge-Universe’s platforms), tickets to major tournaments/events, items to upgrade your Doge-World, and a variety of other items.

Commissions:

Commissions will be earned on all transactions involving their creations. If a newly released NFT is purchased on our market, the creators will earn a commission on the sale. Peer to peer transactions will also incur a transaction fee, from which the creators will receive a percentage. Users are encouraged to conduct transactions on our platform, as this will be the most secure method of transferring their creations. Other modes of payment will incur higher fees. The primary objective is to benefit the entire community, as the entire endeavor is community-driven.

Collaborations & Opportunities:

Creators will be able to collaborate amongst each other on their creations. Such collaborations will create enhanced productivity amongst the Doge-Universe ecosystem. Lesser-known creators will benefit great by collaborating with more-known, thus creating and opportunity for them to increase their followers. Creators will have the opportunity to be featured on the main-page of the marketplace. Selections will be based on their work and skills.
NFT & Gaming

**NFT Ecosystem:**

Creators will be able to submit and create their own game modes and NFTs. There will be two methods for mining NFTs after they are generated.

The first method of mining new NFTs is for players to earn cards by completing objectives and missions inside the game of choice. Our smart contracts will dictate once the objective/mission is completed inside the game. This is referred to as POG (Proof Of Gaming).

The second way is that two duplicates of a single NFT will be generated. This way, only one NFT will be required to mine VIA POG (Proof Of Gaming), while the remaining NFT will be immediately available for sale or trade. Bear in mind that each NFT will have a duplicate. If the creators wish to sell one immediately rather than waiting for it to be mined via POG, they will be able to do so and a corresponding duplicate NFT will be generated for POG mining. But the owner will also have the option to fuse the two duplicate NFTs together to create a NFT with higher rarity and value.

These NFT tier levels give more incentive to the miners performing POG, since they control the narrative of these NFTs inside the ecosystem.
DogeUniverse.Land

Decentra-verse:
DogeUniverse.Land will be a component of Doge-Universe's gaming platform. In the DogeUniverse, a decentralised universe, you can explore, create, destroy, and conquer pieces of land. You will have the ability to create and design your own virtual lands. Build empires complete with armies in order to conjure additional lands and extend your reigns. Travel through the universe's vast voids. Establish your own laws to govern the way your civilisations operate.

Virtual gaming On Simulations:
DogeUniverse will conduct research and development in order to create game possibilities based on simulations such as those in the novel and film Ready Player One. It is improbable that we will one day be able to manipulate the human conscious to the point where we will be able to live in our own simulated worlds. This is accomplished by coupling the human brain to quantum computers, which have an astronomical amount of computational power in comparison to conventional computers. We intend to invest a significant amount of money and time in order to make these dreams a reality.

Endless Possibility's:
Doge-Universe's research and development will benefit gaming, NFTs, and blockchains, as well as the creation of a new ecosystem that will nurture a new generation of: creators, researchers, developers, and gamers. Will make it simple for anyone to make their dreams a reality. We are committed to enacting significant change and positively impacting the lives of billions of people worldwide.
DogeUniverse.Finance

**Rug pull issues:**

Exit scams have grown to be a massive and costly problem that needs addressing. Millions of dollars are being stolen from diligent individuals seeking greatness and success in the cryptocurrency world. The world’s first meme launchpad will provide users with a more dependable and convenient method of launching their meme-coin projects. New project teams will need to complete a series of verifications before being listed on the launchpad. Team members will be required to submit their verified identities, AMA videos about the project, and agree to terms and conditions, public social media profiles and so on.

**Our Solution:**

Doge-Universe will charge a small 5% fee on funds raised. The project will also be required to provide a small percentage of their tokens to Doge-Universe. The tokens will be distributed amongst all SPACExDOGE holders as an additional incentive for holders. The airdropped tokens will also be vested to provide more trust transparency to the entire community. Vesting schedules will be required for new IMOs, reducing initial circulation and requiring the team to lock their tokens for an extended period. This significantly reduces the likelihood of new projects involving rug-pulling (exiting scamming). We want to provide users with a new, more secure, and improved way to invest in meme coins.

**Fairness:**

Users will simply connect their wallet to the platform and purchase new IMOs (Initial Meme Offerings). There will be a limit on the number of IMO tokens that users can purchase, preventing whales from purchasing everything. No overflow method, first come first served. Users will be required to complete captchas prior to purchasing to ensure that bots do not purchase the entire supply. As an addition, investors will be required to verify their profile by purchasing an NFT at a small cost. This new method will be more accessible to small investors, resulting in a more friendly and decentralised environment.

**Exchange:**

Users will be able to exchange their tokens on the DogeUniverse.Finance exchange. SPACExDOGEs holders will receive a percentage of all transaction fees. By simply holding their SPACExDOGEs, users will be able to earn various meme tokens. We will work on implementing liquidity provider pools, which will enable users to provide liquidity in exchange for additional tokens.
DogeUniverse.Finance

Freelancer Platform:

Our decentralized social network will connect projects and individuals in need of blockchain developers, web developers, artists, and other cryptocurrency-related services. To become a service provider, all users must pass a series of verification checks to insure they are qualified to perform the job. We are only interested in providing high-quality services to our community members.

Finding the right person can be difficult and time consuming. We will facilitate this process, which will benefit aspiring developers and projects by expanding opportunities and stimulating growth in the blockchain market. We intend to run this platform in such a way that developers will not be charged a 10%, 15%, or even 20% fee for their work. The primary goal is to inspire creators and to incentivize them to collaborate on other projects that benefit the Doge-Universe ecosystem and the broader blockchain industry.

Friendly reminder:

Although this significantly reduces the likelihood of new projects departing by exit scams, it is always important to keep in mind that nothing is 100% secured. There will always be a risk. As time passes, the exchange will continue to add new ideas and features to enhance security measures for legitimate IMO listings.
Tokenomics

The Token & It's Use-cases

SPACExDOGE is a decentralized community token on the Binance-Smart-Chain. The community token will have a variety of uses, including serving as the currency for all Doge-Universe's platforms and will provide voting rights to the governing community. It will incentivize users to hold the token for the long term. Unlike many other meme-coins, we will provide real-world applications and value for the token. The token will enable us to generate multiple streams of revenue, which will enable us to accelerate the research and development of our planned platforms.

PARAMETERS:

- **Ticker**: SPACExDOGE (space “times” doge) not to be confused with the aerospace company.
- **Max supply**: 100,000,000,000. This supply will make it much easier to scale into the $1 region.
- **18 decimals**.
- **Fees**: 8% fee on all transactions. 3% will be to generate liquidity. 3% will go towards token burning. The remaining 2% will be distributed amongst all holder. This taxation system will be removed once 50% of the max supply has been burned, and we will transition to Staking. Please view the “Hybrid Deflationary System” page for additional information.
- **Market cap**: The initial market cap will be ~$1M since most of the tokens will be vested.
- **Buy-backs**: A percentage from all profits generated amongst all our projects will be used to buy back SPACExDOGEs. 10% of the buy-back will be burned and the remaining will be added to the staking pool. Maintaining a deflationary mechanism and rewarding holders.
- **Please note**: Even the founder must buy his own tokens. Our distribution strategy is geared towards avoiding an excessive number of tokens in circulation at any given time. Private sales are subject to vesting schedules in order to reassure our investors that large holders will not be able to sell a large percentage of the tokens at once. Vesting schedules will also apply to team holdings, reserves, and community holdings. Whales will be unable to purchase the entire supply due to the restrictions on the public pre-sale. We want a fair distribution that benefits small holders first and foremost, rather than being manipulated by whales. Manual burns will also be available.
Tokenomics

25% (25,000,000,000) Private sale:

❖ Early investors will have the opportunity to purchase during the private sale. This will benefit the project significantly because it will allow us to establish early partnerships and deals that will benefit the project in the long run. We'll require funds to cover the cost of the smart contract, the website, the initial liquidity, and other expenses.

❖ Large investors will be enticed to participate in the private sale because the purchase limit will be significantly increased, and the discount will be substantial. Vesting schedules are required for all private-sale buyers in order to eliminate the possibility of all large holders selling everything at the same time. Vesting schedules will significantly improve: the project's value, trust, transparency, and an understanding that all private buyers are in it for the long haul.

❖ The initial liquidity will derive from the money raised by the private sale. Vesting schedule period for a minimum duration of 10 weeks (10% released weekly). We only want long-term holders to be purchasing the on the private sell. Private sale buyers will still be able to receive rewards for the tax distribution. The rewards will not be locked and will be distributed.

20% (20,000,000,000) public pre-sale/ICO:

❖ The price of the pre-sale and listing price will be the same $1 USD per 20,000 tokens (~$1M initial market cap). Completing captchas will be required to prevent bots from buying all the supply.

❖ The pre-sale will last about 7 days. All tokens that are not bought, will be added to the liquidity pool and/or burned. There will be a purchase limit per wallet to prevent whales from buying up everything.

20% (20,000,000,000) staking:

❖ Once the taxation system is removed, we will transmission over to Staking. The addition of the “tax re-distribution rewards” will increase these allocations.
Tokenomics

15% (15,000,000,000) Reserves:
- The reserves will serve as an additional option to add liquidity, treasury budget and obtain funds that could be needed. Or/and for investors/partnerships that will greatly benefit Doge- Universe. Tokens that are not needed will be burned, allowing for additional burnings. Vesting period 100 weeks 1% will be released weekly.

10% (10,000,000,000) Liquidity:
- Will be provided for liquidity. Beginning at ~$1M USD market cap. About 2.5% of the 10% total supply will initially be provided for liquidity. The valuation of the initial liquidity will be approximately $250,000 USD. The more money we raise, the more we’ll be able to add to the liquidity pool.

5% (5,000,000,000) Team wallet:
- Team holdings will be for the development of all platforms and projects that we have planned. Paying salaries and other expenses. This funds will only be sold if needed. If not needed, they will be burned. These are strictly for the purpose of thanking our amazing and future team members. Vesting period of 100 1% will be released weekly.

3% (3,000,000,000) Community:
- Community allocations will be distributed back to community members who bring quality contributions to the project. These are strictly for community members only. Vesting period of 100 weeks 1% will be released weekly.

2% (2,000,000,000) Elon Musk & SpaceX:
- These tokens are allocated to Elon Musk and SpaceX for their contributions to the advancements of mankind’s technology that will allow us to eventually become a type 1 civilization and beyond. 1% to Elon Musk & 1% to SpaceX.
Hybrid Mechanism

“Taxation” system:
The taxation system works in such a way that users are charged a certain percentage (8% in our case) per transaction on, including buy and sell transactions. The goal of this system is to generate liquidity that will be added to the liquidity pool. Holders will receive a percentage of the 8% redistribution. The final and perhaps most important addition is that a large portion of the 8% will be used to burn the tokens. This system is excellent for generating liquidity, rewarding token holders, and burning tokens.

The 8% will be divided as follows:

- 3% will be to generate liquidity.
- 3% will go towards token burnings.
- The remaining 2% will be distributed amongst all holders.

The issues:
One of the main problems with this system is that no one wants to pay a high fee for peer-to-peer transactions; doing so undermines the true vision and purpose of a decentralised payment method. Another issue is that it has a somewhat negative appeal, which makes the project appear to many investors to be a short-term “profit taker.”

The solution:
To address these issues, once we reach a 50% burn (50 Billion tokens) of the maximum supply, we will completely abolish the “tax” system and completely remove the fees. We will make the switch to Staking. Holders would be able to continue earning additional rewards by staking their tokens. A percentage from all profits generated amongst all our projects will be used to buy back SPACExDOGEs. 10% of the buy-back will be burned and the remaining will be added to the staking pool. We are able to create better tokenomics that are much more suitable for the project's long-term vision by utilising what we call a "hybrid deflationary mechanism."
DAO

Core Team Governance:
The team has three primary goals: to improve use cases, to advance development, and to maintain a well-organized and decentralised community. Assuring that no single entity controls the entire project. The core team will develop proposals for partnerships, listing, development, budget spending, governance rules, and assigning new team members, among other things. NDAs will remain confidential until we receive permission to make them public. Only the core team will be able to vote on Non-Disclosed Agreements, as they will not be made public until we receive permission to do so. Anyone is able to become a core-team member depending on their contribution to the project.

Core Team Roles:
The roles of the Core Team consists off:

Meme Executive Officer: The MEO is the leading team member and the highest rank within the project. The duties of the MEO are like a CEO.

Commander In Meme: The CIM are potential candidates that will take over as the MEO in case the current MEO will no longer be able to hold its position or if the community has voted to fire the existing MEO.

Researchers and developers: Those who are employed for the advancement of project development and research, who will contribute to the design of our future platforms, NFT’s and video games.

Marketers/Social media: Marketers will be accountable for collaborating with a variety of influencers, news publications, content creation, and projects. Social media managers will be accountable for the community's growth on our various social media platforms through announcing, responding to and creating new content for our members.

Chief mods: These individuals will serve as our chief moderators on social media platforms such as discord and telegram. They will monitor all activity and ensure that all community members and investors have a positive and transparent experience. Whilst also equipping the mods with necessary needs.

Master shill bills: Will be limited to the most influential community members who have demonstrated a clear contribution to the growth and expansion of Doge Universe through promotion and education of unaware communities.

The requirements for this status will be: 'A member for 6 months with 500 invites to either our discord. There will be a reward of $500 USD worth of “SPACExDOGE” for achieving this status. The token reward will only be available to the first 25 people who unlock it.'
Team Governance:

The purpose of team governance is to assist the core team in advancing their development while maintaining significant roles in the community. These roles will be filled by the most dedicated members of our community who are willing to dedicate their skills and communications to the cryptocurrency communities. This part of the team will also be able to create proposals on any changes brought upon.

Mods: Mods will assist the chief mods in overseeing that our Discord & telegram maintains an optimal experience for community members and investors. By actively engaging with community members, you will be responsible for answering any questions or concerns with valid input regarding Doge universe.

Shill bills: Community members who have shown their commitment to Doge Universe by promoting and educating unaware investors. There will be a reward of $50 USD of “SPACExDOGE” for achieving this status. The token reward will only be available to the first 100 people who unlock it.

The requirements for this status will be: A member for 3 months and 100 discord invites.

Master holders: Will give the opportunity to long term holders to have greater voting power since they’ve shown dedication to our project.

The time frame in which to achieve this status is 6 months since your first token purchase.

Special roles governance: The purpose of special roles is to incentivize another addition to the community in which active members or large investors/holders can have further voting power and create proposals that will be voted on.

Active community members: These will be members who are active with inputs and discussions throughout our social media. Active engagement and contribution to Doge Universe will be the fastest way to achieving this status.

Stakeholders: By having multiple tier lists for voting, it allows our more substantial holders to have a larger say in the direction of Doge Universe. We believe this will be beneficial to the project due to larger investors being more dedicated and influential in regards to our future.
DAO

Voting power

Core team “community” voting power = 3 votes per 1 token

Team “community” voting power –

Mods = 2.5 votes per 1 token
Shill bills = 2.5 votes per 1 token
Master holders = 2.5 votes per 1 token
Active community members = 1.5 votes per 1 token

Stakeholders

10,000,000 - 99,999,999 tokens = 1.5 votes per 1 token
100,000,000 - 999,999,999 tokens = 2 votes per 1 token
1,000,000,000 + tokens = 2.5 votes per 1 token.
Concerns regarding PoW:

According to the Cambridge Center for Alternative Finance (CCAF), bitcoin currently consumes around 110 terawatt hours per year. ~0.55% of global electricity production, or roughly equivalent to the annual energy draw of small countries like Malaysia or Sweden. Bitcoin’s consensus mechanism is named Proof of Work (PoW). The PoW mechanism requires a vast amount of computing resources, which consume a significant amount of electricity.

Proof of Stake (PoS):

On a Proof of Stake (PoS) blockchain, those validating transaction blocks have to put something at stake so others can trust them. If these validators have something at stake, they have something to lose. This collateral is enough of an incentive for them to tell the truth and maintain the integrity and security of the network. In contrast to PoW, PoS does not require vast amount of computational power. PoS is over drastically more efficient than PoW

Our Mechanism:

Our new and genius mechanism utilizes what we call “Hybrid Deflationary Model” (HDM). HDM is a hybrid mechanism that charges a percentage fee for every transaction. This transaction fee is mainly used for “burning” tokens from circulation, creating liquidity for the liquidity pool and rewarding users for holding the tokens. Once 50% of token burning has been accomplished, we will transition over to Staking. Our HDM is significantly more efficient than Bitcoin’s Proof of Work.

100% Eco-Friendly dedicated:

Our team and project are 100% dedicated towards eco-friendliness. Part of our responsible and inspiration is to do anything we can to make our world an eco-friendlier place. A large percentage of our profits will go towards increasing the contributions & practices of eco-friendliness. Such contributions will be restoring destroy areas, flourishing areas with no trees/plants, researching and developing ways to become a 100% eco-friendly blockchain, and so much more.
2021 RoadMap

We’ll work to accomplish, add, and enhance roadmap events. Any suggestions from the community to improve or add events will be listened to and considered. The majority of events will almost certainly not occur in the order listed below. While certain events may occur sooner or later, it is our intention to expand and advance the project at a significant and rapid pace while achieving perfection.

➢ Q3 2021:

❖ Finish website and litepaper
❖ Create and release AMA videos introducing the owner and team members
❖ Initiate marketing campaign.
❖ Begin and conclude private presale & pre-sale.
❖ Create and run audits on the smart contract.
❖ Tracking listings such as: PancakeSwap, BlockFolio, CoinMarketcap, CoinGecko, PooCoin etc...
❖ Begin work on the exchange and IMO platforms.
❖ Have a team of at least 15 moderators to moderate telegram, discord, YouTube and other social media platforms. (Multilingual mods)
❖ Add improvements and advancements on the whitepaper, website, DogeUniverse.org, development plans and just about anything we think of to improve the project.
❖ Have at least 1,000 holders by the end of the (Q3 2021).

➢ Q4 2021:

❖ Top 10 exchange listing.
❖ Have the DogeUniverse.finance exchange and IMO platform fully completed and released.
❖ Expand team to at least 30 team members: 4 developers, 4 social media manager and marketers, 22 national and international moderators.
❖ Begin development for the NFT mining/gaming platform.
❖ Continue releasing monthly AMA videos and weekly live streams about the project.
❖ Establish at least 25 partnerships with: other projects, influencers, & content creators.
❖ 20,000 holders by end of Q4 (2021).
❖ End of year review.
Team

Wagner Mencias  **MEO, Founder, Marketing, Social-Media, Everything**

I've been involved with crypto since 2017. I taught myself everything I know about cryptocurrency by watching numerous content creators and educators on YouTube and other platforms. I enjoy crypto because it allows me to meet new people, have a good time, assist other communities and most importantly develop new ideas that will contribute to the success and development of crypto. My area of expertise is assisting other projects and bringing people together.

Sandy Mencias  **Mod, Multi-lingual comms (English, Spanish & French)**

With over seven years of experience and a reputation for providing exceptional customer service in a variety of industries. Fluent in English, Spanish, and French with a high level of proficiency. Biology associate's degree, CSN, 2019. Since 2018, I've been involved with cryptocurrencies. I believe that cryptocurrency is here to stay and will undoubtedly make a significant contribution to the world.

Tristian Allèn  **Marketing & Social Media Manager, Mod**

Since 2018, as a cryptocurrency enthusiast and investor, I've immersed myself in all facets of the space, including micro-cap and colossal project development, and the science of block chain technology. After discovering my interest in cryptocurrency, I've decided to combine my skills in digital marketing and communications to help DogeUniverse achieve the best possible success. I'm looking forwards to helping Doge universe reach its full potential by collaborating with some of the most brilliant minds in the space.

Raul Salinas  **WED DESIGNER & FRONT-END WEB DEVELOPER, MOD**

I have over 4 years of experience in front-end web developing focused on CSS and HTML language. I’m currently majoring in Computer Science in two universities: UNLV and UNAM. I decided to approach the Doge Universe project in order to bring together my 2 current passions: Crypto and Websites.

We are currently looking to expand our team with high quality members. If you feel that you have the requirements to further build our succession, please message our email or social medias.
#1 What is Doge Universe?

Doge Universe is a meme-coin that aims to provide real use-case products and solutions to everyday crypto related problems.

#2 What are the main problems that Doge Universe aims to solve?

1. Reduce the possibilities of rugs-pull and other scams.
2. Facilitate the process of hiring crypto free-lancers.
3. A blockchain that minimizes vast amounts of energy and resources.
4. Heavily reduced transaction fees.
5. Combating inflation through a hybrid deflationary mechanism (HDM).
6. NFT’s losing value due to saturation from developers.

#3 How will Doge Universe solve these problems?

1. Developing a launch-pad IMO (Initial Meme Offering) in which projects and team members will undergo various steps to confirm their identity, audits, and additional steps to reassure our investors that they are investing in trustworthy projects.
2. Building a premium crypto-based free-lancer platform.
3. Pioneering a new method to combat inflation; Hybrid Deflationary Mechanism (HDM). A mechanism which is drastically more efficient than Bitcoin’s Proof of Work (PoW).
4. Our token is based on Binance’s Smart Chain. The fees are a couple of cents. We’ll eventually create our own blockchain in which fees will be less than 1 cent.
5. Establishing the first hybrid deflationary mechanism. This entails burning 50% of our total supply through transaction fees, then switching to Staking.
6. Proof of Gaming (POG) is another new mechanism we’ve created. POG increases the rarities and value of NFTs. This is by giving gamers the ability to mine for NFTs through gameplay. Also, creating a new social ecosystem within the NFT communities.
#1 How trusted and transparent is Doge Universe?

Trust and transparency are two of our primary objectives. We are a public, open-source project. Since 2017, Wagner Mencias (the founder and MEO) has been involved in cryptocurrency and other projects. He is currently a member of the USX Quantum leadership team (https://www.quantumcode.org/) and has been a member of the community since 2017.

#2 Are the team of Doge Universe anonymous or public?

The team is public, as are their social media profiles. We want to demonstrate complete trust and transparency to our users and investors.

#3 Will Doge Universe consider establishing a legal entity?

We don’t really have plans to establish a legal entity since Doge Universe is established as a DAO, which allows for the project to be community driven with no central point of control or authority.

#4 How transparent are the tokenomics?

Even the founder is required to purchase his own tokens. Our distribution strategy is designed to keep an appropriate number of tokens in circulation at any given time. Private sales are subject to vesting schedules to reassure our investors that large holders will not be able to sell a large proportion of their tokens at once. Vesting schedules will also apply to team ownership, reserves, founder ownership, and community ownership.
Section 3 (Private sell)

#1 When will the private sale begin?

The private sale will begin once all legalities have been resolved. The sale should commence in August 2021.

#2 Who can and how will I participate in the private sale?

Due to being established as a DAO. We are community driven project; everyone is required to confirm their country’s laws and regulations for confirmation if they are legally allowed to participate on the sale.

#3 Which currencies/cryptos will be accepted for the private sale?

As of now, we will be accepting BTC, most major stable and alt coins including BNB, ETH, ADA, USDC, USDT, BUSD and many more. Due to certain laws and regulations, we’ll discuss with our lawyers which other currencies we can legally accept.

#4 When will I receive my purchased tokens?

The private sale tokens will be vested for a minimum duration of 10 weeks and released 10% weekly. The first vesting schedule will be released 1 week after the pre-sale concludes.
FAQ

Section 4 (Pre-Sale/ICO)

#1 When will the pre-sale/ICO sale begin?

The pre-sale/ will begin once the smart-contract has been released and fully audited. The sale should begin in August.

#2 Who can and how will I participate in the pre-sale/ICO?

Due to being established as a DAO. We are community driven project; everyone is required to confirm their country’s laws and regulations for confirmation if they are legally allowed to participate on the sale.

#3 Which currencies/cryptos will be accepted for the pre-sale/ICO?

As of now, we will be accepting BTC, most major stable and alt coins including BNB, ETH, ADA, USDC, USDT, BUSD and many more. Due to certain laws and regulations, we’ll discuss with our lawyers which other currencies we can legally accept.

#4 When will I receive my purchased tokens?

The purchased tokens should be distributed the same day of the pre-sale/ICO sale. Depending on which raising platform we utilize.
FAQ

Section 5 (Long-term vision and Values)

#1 What is the long-term vision of Doge Universe?

Our long-term goal is to establish one of the most prominent cryptocurrencies. We intend to enable a variety of use cases and products that will have a significant impact on the world and financial sector.

#2 How does Doge Universe survive during volatile (bear) market conditions?

We have a robust reserve which will continually strengthen. Our products will enable us to generate multiple revenue streams from a variety of different sources. We will strengthen our reserves to reassure our members that we will be able to weather any adverse market conditions and continue to maintain a healthy community.

#3 What are some values that Doge Universe believes in?

Our primary value is that we must treat everyone in our community with dignity. Maintaining team morale by treating them with the appropriate respect, whilst ensuring their financial stability and growth in the project. We will provide superior service with previously listed solutions. Eco-friendliness is another top priority for us, and we will make every effort to increase our contributions and practises to decrease energy consumption.

#4 Will Doge Universe make efforts towards educating new investors?

Of course. We will make efforts and resources. One of our platforms will be devoted to educating first-time cryptocurrency investors. Scammers have developed into one of the most malicious issues in crypto. We will educate new investors about these scams in order to protect them from having their hard earned money stolen.

#5 Our multi cycle plan

We understand that there will be downtimes throughout the market as a result of the recurring cycles created by bitcoin's halvening. By utilising our hybrid deflationary mechanism, we will have the necessary reserves and capabilities to sustain growth throughout the market's bear stages. Our objective is to pursue long-term growth and market share.

Before making any investment decisions, the Doge Universe team recommends that you conduct your own due diligence and consult with a financial advisor. With purchasing any Doge Universe product, you agree that you are not making an investment or purchasing a security, and that you will hold the team harmless and not liable for any losses or taxes you may incur. Additionally, you acknowledge that the team is providing the product "as is" and is not obligated to provide support or services. No one associated with this whitepaper or Doge Universe accepts responsibility for the asset's performance, the delivery of tokens to your wallet, or the wallet's security. When purchasing cryptocurrencies, it is your responsibility to take all necessary security precautions. Although Doge Universe is a community-driven ecosystem and not a registered digital currency, the team strongly advises citizens in jurisdictions where cryptocurrency is prohibited to avoid purchasing products associated with Doge Universe, as the team cannot guarantee compliance with your jurisdiction's regulations. Always verify that you are complying with applicable local laws and regulations prior to making any purchase.

Private sale and pre-sale will have specific conditions to who is allowed to purchase our native token "SPACExDOGE". No refunds will be issued to those who purchase any Doge Universe products, whether in compliance with or in violation of applicable local laws and regulations. Our private and pre-sales are solely for the purpose of funding a community-driven ecosystem, the outcome of which we cannot guarantee.
